Samantha Bailey has submitted a request for a major curricular change. His/her email address is: samantha.bailey@wsu.edu.

**Requested change:** Revise or Drop Graduate Plan

**Degree:** M.S. in Chemical Engineering

**Title:** Chemical Engineering - Thesis

**Requested Effective Date:** Fall 2019

Revise plan requirement: Yes

**Dean:** Field, David - Assoc Dean - VCEA - Grad,

**Chair:** Petersen, Jim,

---

**UCORE Committee Approval Date**

**All-University Writing Com / Date**

---

**Catalog Subcommittee Approval Date**

**GSC or AAC Approval Date**

**Faculty Senate Approval Date**
I approve this proposal in its current form.

--Jim

Petersen, Jim,

Field, David - Assoc Dean - VCEA - Grad,

Samantha Bailey has submitted a request for a major curricular change.

**Requested change:** Revise or Drop Graduate Plan

**Degree:** M.S. in Chemical Engineering

**Title:** Chemical Engineering - Thesis

**Requested Effective Date:** Fall 2019

Revise plan requirement: Yes

Both Chair and Dean approval is required to complete the submission process. Please indicate that you have reviewed the proposal by highlighting one of the statements below and reply all to this email. (curriculum.submit@wsu.edu)

[Details of major change requested can be found in the attached supplemental documentation]

1. I approve this proposal in its current form.

2. I approve this proposal with revisions. Revisions are attached.

3. I do not approve this proposal. Please return to submitter.

If you do not respond within one week, you will be sent a reminder email. If no response is received within three weeks of the submission date, the proposal will be returned to the submitter.
Thank you for your assistance as we embark on this new process. If you have any questions or concerns, please let us know wsu.curriculum@wsu.edu.

Suzanne Lambeth, Assistant Registrar

**Rationale**

Transport phenomena, chemical reaction engineering, and chemical thermodynamics form the core of the chemical engineer's thought processes. In recent years, the faculty of the chemical engineering program have found that many of our MS graduates have not completed upper division coursework in these topics and therefore are not grounded in core chemical engineering principles. This lack of grounding adversely impacts the student's ability to conduct outstanding, cutting edge research since the student must learn these materials in a just-in-time fashion while conducting research. In a recent faculty meeting, the chemical engineering faculty voted to revise the graduate curriculum to enable students to focus on these core topics.

In addition to these core technical topics, the chemical engineering faculty believe all students benefit from a core course that teaches students how to conduct research and to communicate research results and proposals. In the past, these topics have been taught in a two course sequence, ChE 596/597, each of which was two credits. Under a separate proposal, this sequence is reduced to a single, 3-credit course.

All impacted courses are in chemical engineering, so no other academic programs should be impacted by this change.

**Current and Proposed Requirements**

**MS in Chemical Engineering (Thesis):**

- **Core: must complete all of the following (4 courses total):**
  - CHE 510 (3 credits)
  - CHE 541
  - CHE 596 (Research Methods and Communications – 3 credits)
  - CHE 529 (Kinetics for 3 credits)
  - CHE 597

- **Thermodynamics or Kinetics: 3 credits minimum:**
  - CHE 527
  - CHE 529

- **Graduate Seminar: 2 credits minimum:**
  - CHE 598

- **Supporting Courses: 9 credits minimum:**
  - Chosen in consultation with the advisor and committee
  - Note: Only 1 credit of E_MIC 586 can be applied to supporting courses

- **Research Credits: 9 credits minimum:**
  - CHE 700

  Pass Final Exam
  - Consult the program handbook for more information regarding this requirement

- **Total Graded Credits: 21 credits minimum**
- **Total Credits: 32 credits minimum**
Applicable Graduate School Requirements:

- **Graded Credits: 21 credits**
  - Students may use a maximum of 6 credits of undergraduate coursework (300-400)
- **Research Credits: 4 credits**
  - CHE 700
- **Total Credits: 30 minimum**
